

Claims

The claimed invention is:

Suba 1. A television comprising:

a connection configured to be operatively coupled to a connection of an other television; and

a processor configured to provide query information to the other television and configured to provide queried information in response to a query request from the other television.

Sub C 2. The television of Claim 1, wherein said connection is configured to provide said query and queried information to the other television.

Sub B 3. The television of Claim 1, wherein said processor is configured to receive query compliance status information identifying the query compliance status of the other television.

Sub A 4. The television of Claim 3, wherein said processor is configured to receive identifying information from a user prior to enabling the user to do at least one of set and change query compliance status information.

Sub C/ 5. The television of Claim 3, wherein said processor is configured to provide any queried information to the other television that does not violate the query compliance status of the other television.

6. The television of Claim 1, wherein said connection is one of an in-home network connection and an Internet connection.

Sub A2/ 7. A communication system comprising a plurality of televisions interconnected together, wherein said televisions are configured to provide query information to others of said plurality of televisions and are configured to provide queried information in response to a query request from said others of said plurality of televisions.

Sub C/ 8. The communication system of Claim 7, wherein each of said plurality of televisions is configured to receive query compliance status information identifying the query compliance status of each other of said plurality of televisions.

Sub C/ 9. The communication system of Claim 8, wherein each of said plurality of televisions is configured to receive identifying

information from a user prior to enabling the user to do at least one of set and change query compliance status information.

10. The communication system of Claim 8, wherein each of said plurality of televisions is configured to provide any queried information to others of said plurality of televisions that does not violate the query compliance status of said others of said plurality of televisions.

11. The communication system of Claim 1, wherein each of said plurality of televisions are configured to be interconnected by one of an in-home network connection and an Internet connection.

Sub A3 12. A method of providing communications between a plurality of televisions, said method comprising:

a. sending a query request from any of said plurality of televisions to any other of said plurality of televisions, and

b. sending queried information from said any other of said plurality of televisions to said any of said plurality of televisions that sent the query request.

sub c/ 13. The method of Claim 12, comprising identifying each of said plurality of televisions to each other of said plurality of televisions prior to act a.

sub B5/ 14. The method of Claim 13, wherein said identifying comprises identifying a query compliance status between each of said plurality of televisions.

sub c/ 15. The method of Claim 13, wherein said identifying is performed by a mediator that is separate from each of said plurality of televisions.

sub B6/ 16. The method of Claim 12, comprising confirming a query compliance status of said any of said plurality of televisions that sent the query request prior to performing act b and not sending queried information if said query violates said query ~~compliance status.~~

sub c/ 17. The method of Claim 16, comprising receiving said query compliance status of said any of said plurality of televisions from a user of said any of said plurality of televisions.

zule
9

18. The method of Claim 17, comprising requesting user identifying information prior to receiving said query compliance status and not altering said query compliance status if altering said query compliance status violates access rights of said user.
